Information

What are field groups?
A field group contains one or more fields. These can be applied to a single product, or groups of products.

What is a field?
A field can be a drop down list, checkboxes, file upload, etc.

Editor
Use this to edit the form that will show on the product page.

To Select Products to be customized:
Go to Apps → Field Groups → Add Field Group

Help / FAQ

Name

This is just for your informational purposes only, and isn't shown to your customers.

Test

Product Tags

You can use either product tags OR specific products to decide which products the fields will show up on.

Sort Order

When multiple field groups are assigned to the same tag or products, this is the order the fields will be in. A lower number will show up higher.

1

Specific Products

Specific products and tagged products will NOT be combined. Specific products will take precedent and any tagged products above won't have the field group show.
