SALES CHANNELS Online Store Themes Blog posts Pages Navigation Domains Preferences

First, lets make a copy of your theme so you have a backup of your theme. To do this: Go to your **Themes** then click the **Actions** button next to the theme name and click **Duplicate**

Jumpstart Last saved 37 minutes ago

Actions Customize

View Rename Duplicate Download theme file Edit code Edit languages

More themes Manage your store's themes. Add and publish themes to change your online store's appearance.

Theme name	Last saved	Actions	Customize
Debut	-	Actions	Customize

cart.liquid x

cart.liquid Older versions

```
1 [{} comment {}]  
2 The contents of the cartliquid template  
3 [{} endcomment {}]  
4  
5 [{} section 'cart-template' {}]
```

If your cart file looks like this then you will need to find the rest of the code in another file

The rest of our code will be located in the **Sections** folder in a file called **cart-template.liquid**

If your cart.liquid has all of the code you can skip this step

section tells us which folder the rest of our code will be located in

'cart-template' lets us know what the file name is

cart.liquid cart-template.liquid

Here we placed our widget code, you don't have to place yours right here but do make sure its inside the <form> </form> Click **Save** and your ready to start using the app!

```

<a href="#" style="display:none;" class="save-purchase-order-w3" data-customer-id="{{ customer.id }}" data-customer-email="{{ customer.email | escape }}"></a>
<button type="submit" name="update" class="btn btn--regular btn--dark btn--outline btn__update">
<span aria-hidden="true">{% include asset_svg with "reload" %}</span>
<span class="fallback-text">{{ 'cart.general.update_cart' | t }}</span>
</button>
<button type="submit" name="checkout" class="btn btn--regular btn--color btn--fill">{{ 'cart.general.checkout' | t }}</button>
<a href="#" style="display:none; float:left;" class="save-purchase-order-w3 btn btn--regular btn--color btn--fill" data-cust
</div>
</div>
</form>
{% else %}
<div class="text-center">
<p class="cart--empty-message">{{ 'cart.general.empty' | t }}</p>
<div class="cart--cookie-message">
<p>{{ 'cart.general.cookies_required' | t }}</p>
</div>
<a href="/" class="btn btn--dark btn--outline">
{{ 'cart.general.continue_browsing' | t }}
</a>
</div>
{% endif %}

```

NOTE:
Sometimes the form will appear like this instead: {% form %} {% endform %}
It still works the same, just looks a bit different
